Method Interaction on testRunStarted

ConcernMapper

PDETestListener.java

```

    }
    return xmlResultsFormatter;
  }

  public synchronized void testRunStarted(int testCount) {
    totalNumberOfTests = testCount;
    testsRunCount = 0;
    numberOfTestsPassed = 0;
    numberOfTestsFailed = 0;
    numberOfTestsWithError = 0;
    testRunEnded = false;
    getXMLJUnitResultFormatter().startTestSuite(junitTestSuite);
    System.out.println("PDE Test Run Started - running ");
  }

  public synchronized void testRunEnded(long elapsedTime) {
    testRunEnded = true;
    junitTestSuite.setCounts(testsRunCount, numberOfTestsPassed, numberOfTestsFailed, numberOfTestsWithError);
    junitTestSuite.setRunTime(elapsedTime);
    getXMLJUnitResultFormatter().endTestSuite(junitTestSuite);
    System.out.println("Test Run Ended - " + (failed() > 0 ? "Failed: " + failed() : "Passed: " + testsRunCount));
  }

```

AbstractShellBuilder.java

```
* Copyright (c) 2009, Elias Volankis
package de.volankis.ribbonide.internal;

import java.util.ArrayList;

public abstract class AbstractShellBuilder {

    private final Shell shell;
    private final List<AbstractTabBuilder> tabBuilders = new ArrayList<AbstractTabBuilder>();

    private RibbonShell ribbonShell;
    private String text;
    private Image image;

    public AbstractShellBuilder(Shell shell, String shellName) {
        Assert.isNotNull(shell);
        this.shell = shell;
        Assert.isNotNull(shellName);
        text = shellName;
        image = ICE.getImage("eclipse_24.png");
    }

    public final void addTabBuilder(AbstractTabBuilder tabBuilder) {
        Assert.isNotNull(tabBuilder);
        tabBuilders.add(tabBuilder);
    }

    public Control create() {
        ribbonShell = new RibbonShell(shell);
        ribbonShell.setButtonImage(image);
        ribbonShell.setText(text);
        configureHelp(ribbonShell.getRibbonTabFolder());
        fillBigButtonMenu(ribbonShell.getBigButtonMenu());
        fillQuickAccessToolbar(ribbonShell.getToolbar());
        ribbonShell.addBigButtonListener(new SelectionAdapter() {
            @Override
            public void widgetSelected(SelectionEvent evt) {
                ribbonShell.getBigButtonMenu();
            }
        });
    }
}
```

Writable Smart Insert 2:1

How?

- application extension point

```
<extension
  id="app"
  point="org.eclipse.core.runtime.applications">
  <application>
    <run class="de.volanakis.ribbonide.internal.app.RibbonIDEApplication"/>
  </application>
</extension>
```

- custom WorkbenchWindowAdvisor

```
public class RibbonIDEWorkbenchWindowAdvisor extends IDEWorkbenchWindowAdvisor {

    public void createWindowContents(final Shell shell) {
        IWorkbenchWindowConfigurer configurer = getWindowConfigurer();

        Control ribbon = createRibbon(configurer.getWindow());
    }
}
```

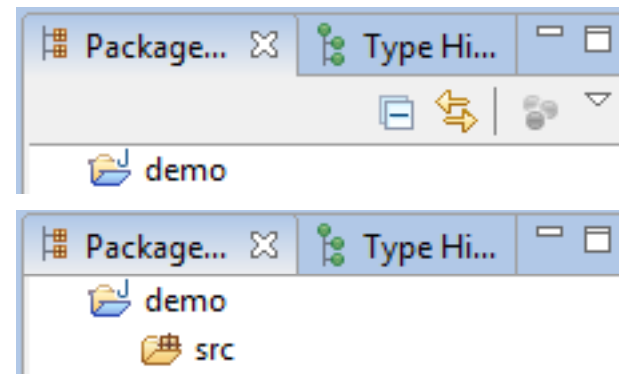

- forks the [Hexapixel Ribbon](#) – thanks Emil !

Future Ideas

- Build Health Indicator

- Custom Presentation

- Integrated Dashboard

- Content customization (EP)
